Civilian pretentions

The core of the Freemasonic plot is the censorship. The fact that the clowns of the cantonal court VD and the Swiss Federal Court did cooperate to implement illegal censorship of the Internet is an additional evidence of the really existing Freemasonic plot against the citizens. Swisscom/Bluewin, who are the dominant Internet access Providers in this country are playing indeed a very bad game. The censorship of the Web is the basis of the Omertà prevailing in our Mass Media. Censorship is hindering the public opinion to grab the impact of the hidden powers, and the judiciary victims from imposing their rights.

Myself, I have been jailed during 4 years for repressing illegally the freedom of expression. My civilian pretentions are calculated as follows:

CHF 2'000 by day of imprisonment x 365 days x 4 years = CHF 2'920'000 + approximately ½ Mio CHF for «judiciary fees», accumulated in form of loss certificates.

It would be unfair to have the tax payers to assume this damage. It is up to the offenders who abused of their power, among others those who implemented the illegal censorship, to respond with their personal assets for covering my civilian reserves.

With kind regards

Gerhard ULRICH of Guntalingen
