cc:

To all federal Members of Parliament and Federal Councillors

To whom it may concern

The judiciary dysfunctioning / The terror of the KESB

Dear Sir,

By letter of June 12, 2018 you communicated your point of view, according to which just isolated cases did exist. What kind of statistics are you referring to for corroborating your statement?

The German Federal Judge ESCHBACHER estimates that a quarter of the penal condemnations are miscarriages. According to my systematic observations/annotations, collected since 18 years, the same applies to Switzerland: I estimate that our country is producing yearly 10'000 judiciary victims. The victims of the KESB are constituting the most important category – probably 1'000 to 2'000 messed up affairs / year.

Personally, I know unbearable KESB cases in 13 cantons. Expressed otherwise, 1 out of 10 Swiss is caught by the system during his 80 years of life, out of which 1 to 2 per 100 inhabitants as victims of the KESB.

Anyway, the criticized judiciary Magistrates did smell the danger to be unmasked one day. For which other reason are they censuring the Internet in full illegality, using the same methods as North Korea (falsification of the DNS), with that difference, that the subjects of KIM JONG-UN are aware to be censored, whereas the Swiss ignore it blissfully:

www.worldcorruption.info/index_htm_files/gu_2018-01-27_plainteOCHR-e.pdf

(Complaint for illegal censorship of the Internet against Switzerland at the UN).

The problem is, that practically no Member of Parliament is knowing the real situation. The brain laundry by the dogma of the separation of powers is preventing you to get acknowledged with the reality. The famous separation of powers is nebulous. You are electing the Federal Judges who are not fulfilling their duty to search the truth and to realize the quality control, expected from them. In 2016 the Federal Court accepted just 2.3 % of the complaints. The 7'800 rejected applicants (97.7 %) would hence be querulous, not able to distinguish good from evil? Let's admit a little bit of common sense!

The National Councillor Luzi STAMM, former President of the Court of Baden AG, may be presently the most competent among you in this matter. He has watched my analysis presented in the video

www.youtube.com/watch?v=re590mkXZIA

Mr. STAMM did acknowledge me to have presented the situation reasonably and moderately.

As long as you remain locked up in your golden cage of the non existing separation of powers, you are hindered to assess the catastrophic situation of the judiciary system. Like the alibi organization Transparency International you refrain from studying concrete slippages, remaining in your golden cage – pure theorists.

*In his book De l'esprit des lois, Montesquieu, to whom one is alleging this erroneous dogma, is not speaking of separation but distribution of powers. His philosophy has been wrongly interpreted. Any absolute power degenerates without control from the outside. One has to re-establish the **distribution of powers** with check and balances between legislative and judicative.*

There exists no objective reason for you to refuse to engage in a dialogue with judiciary victims. From our side, I will care to constitute a delegation of half a dozen brains which will match with your level.

Herewith, I reiterate my demand presented in the petition of March 20, 2018 to be received for presenting to you the factual situation of the judiciary system.

*Hoping to see in my lifetime this dialogue to emerge, I remain sincerely yours,
Mr. President of the Commission of Legal Affairs of the Council of States*

Gerhard ULRICH of Guntalingen
