

***Inventory of new convictions of the whistleblower
Gerhard ULRICH since his release in April 2014,
after having served a four years sentence in prison for telling the truth...***

The disturbing Website

Since 2016, ULRICH is publishing his enquiries on
www.worldcorruption.info/ulrich.htm

In case of censorship access via a proxy, e.g. <https://kproxy.com/>

To date, about 200 trilingual documentations (French, German and English) are published. As a rule, reported criminals generally keep low profile when the truth is unveiled. They avoid the risk that their actions are debated in public. Only 1 publication out of 20 of these documentations has triggered off a penal complaint against the author.

The convictions that have resulted, or will result, are listed below. They start with the sentences of the judges. The convicted person claims to have told the truth. For each conviction, links lead you to his point of view for each case. Readers will therefore be able to assess the facts of each case themselves, to form their own opinions. Who told the truth? ULRICH or the judges in charge of the case? Here are the convictions in chronological order:

1. Conviction of November 28, 2017 to 100 days-fine for alleged slander at the costs of the criminal arsonist freemason Claude BUDRY

In addition to the 400 enforceable prison days, there are 113 days of detention projected ahead. This adds up to 513 days - currently. This is hardly the end.

Comments of the concerned

At the beginning of my struggle against the degeneration of the judicial system, I set out my strategy as follows:

To stick at any time to the truth. If necessary, admit rigorously my own mistakes, and to correct them. Since truth is an abstract term, I am defining the search of the truth as the endeavour to collect facts – What does exist? What does not exist? This is nothing else than the application of the theory according to Kepner-Tregoe:

<http://de.wikipedia.org/wiki/Kepner-Tregoe>

You always have to be able to question yourself. It is precisely this ability that is sorely lacking among black robes. The exceptions are extremely rare.

Judges and prosecutors barricade themselves behind their procedural truths, whatsoever the cost. If need be, they resort to the repression of the right to freedom of expression. This violation of human rights does not impress me.
