## Profile

This magistrate has wreaked havoc on a large scale in the canton of Vaud, but remained a first instance «judge», starting in the Valley de Joux, then at La Côte VD. Has once was forced to apologize for a «regrettable omission». In fact, LADOR had schemed up a questionable plan to avoid an important witness to discharge an accused, a manoeuver that appears to be one of his bad habits (see letter reproduced below which comes from the author's archives).

To deceive St....., LADOR ordered the court usher to call this witness twice into the lobby. Later, St..... realized that LADOR never had called this witness to the court. In the case of the author, the citing of the defense witness was returned just before the hearing. At the missing of the witness at the start of the hearing, I required the repetition of that citing. LADOR dogged my requirement, saying that they were going to proceed with the debates and that the court (= the sun king LADOR) would decide on that matter later. At the end of the debates LADOR declared that the hearing of this witness was superfluous. Later, after the trial, I discovered in the file the handwritten question by LADOR's secretary: «Should we advise the parties?» (because the citing of that witness had been returned, du to a change of address). LADOR's answer in handwriting as well: «No, I will explain the issue at the audience.»

This witness had changed workplace. With a simple phone call to the person occupying his former position, I was able to get the new address of the missed witness. It was thus a deliberate trick of LADOR to avoid that witness to my discharge.

### **«During the first hours I cried a lot»**

Dear Sir,

Mr. St.... and I have much in common: a whole portfolio of «judges». Among other things, we dealt with the 1<sup>st</sup> investigating «judge» of the La Côte VD, RUEDE, who was investigating nothing at all. Mr. St.... and I were then condemned by the «judge» named LADOR who «missed» in both cases a defense witness without warning us, contrarily to what the procedure imposes.

And in both cases these gentlemen were able to malfunction without being disciplined by their superiors. In a constitutional state, these two individuals should now be in prison for abuse of authority.

In thanking you for the report, I take here the occasion to send my best wishes for the coming year and remain sincerely yours

Gerard ULRICH, Avenue de Lonay 17, 1110 Morges
